Design For A Responsive Workplace

To support truly responsive design, there are key trends shaping modern workspaces. By identifying **six adaptable space types**, we can create environments that flex with user needs delivering optimal experiences for everyone. From fully remote teams to hybrid schedules and those returning to the office, this approach ensures workplaces are purposeful, flexible, and ready for the future of work.

The Hub

Spaces That Spark Creativity

Creativity enhancing zones provide hands-on experiences that stimulate the mind and offer moments to unwind. Whether it's an active setting for idea generation or a calm corner for quiet reflection, these spaces strike the perfect balance between focus and relaxation.

The Heartbeat Of The Workplace

Often described as the heartbeat of the office, the Hub is designed to foster social interaction and meaningful connection. These areas bring people together through comfortable, informal, and thoughtfully curated furnishings that encourage collaboration and a sense of community.

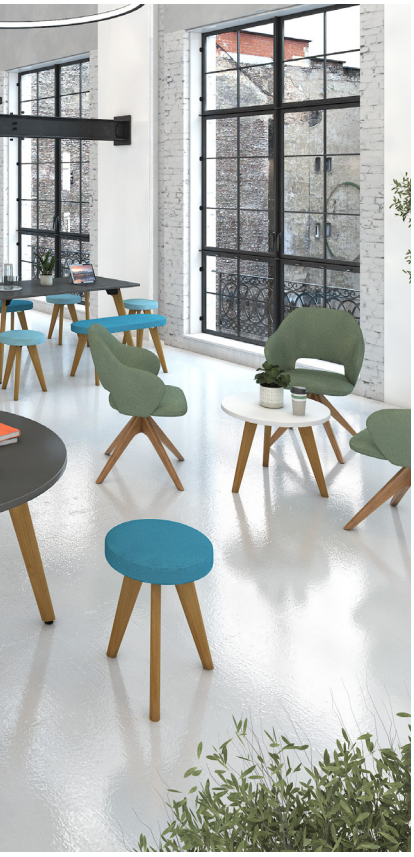
Connecting Through Shared Spaces

Communal spaces build stronger workplace relationships by offering settings that invite conversation and connection. From private focus pods to inviting lounge areas, these environments encourage informal interactions and strengthen team cohesion across the organization.

Collaboration Café

Spaces That Reflect Brand And Culture

These spaces play a pivotal role in expressing an organisation's brand identity and culture while enhancing the overall customer and employee experience. Offering a range of seating options, they provide inviting settings for meetings, informal catch-ups, or simply enjoying a coffee or meal together.



Hospitality As A Workplace Destination

Hospitality-led environments are evolving into key destinations within the workplace. Designed to attract and retain employees, these areas ideally connect to outdoor spaces and feature diverse seating arrangements that support a variety of needs from socialising and collaborative work to quiet moments of relaxation.

Flexibility And Belonging

Flexibility and a sense of belonging are at the heart of an engaging workplace. By creating adaptable spaces that cater to both individuals and teams, organisations can nurture connection, encourage collaboration, and strengthen the social fabric of the workplace community.

Adaptive Workspace

Workspaces That Evolve With The Working Day

Modern workspaces are designed to support employees throughout the day from areas offering visual and acoustic privacy to informal settings that encourage spontaneous conversations. These flexible destinations enable both focused work and impromptu collaboration, ensuring every interaction feels natural and productive.

Choice And Flexibility At The Core

Today's employees value the freedom to shape their own working rhythm. Employers can empower this by offering a variety of settings within the office spaces for concentration, collaboration, social connection, and rejuvenation, allowing individuals to choose where and how they work best.

Supporting The Work Life Balance

A truly supportive workplace extends beyond the office walls. Providing ergonomic, well-designed homeworking solutions enables employees to work comfortably and productively wherever they are. Investing in home workspace design demonstrates care, trust, and a commitment to employee wellbeing.

Meeting Port

Connected Spaces For A Hybrid World

Technology enabled spaces are at the heart of modern collaboration, supporting teams to come together seamlessly in person or virtually. Designed for functionality and flexibility, these conference rooms and huddle areas inspire communication, creativity, and problem-solving across all levels of the organisation.

Seamless Collaboration For Every Setting

While many employees still value face-to-face teamwork, the reality of today's hybrid world demands adaptable solutions. Creating inclusive, tech savvy meeting environments ensures that everyone whether on site or remote enjoys an equitable, engaging experience.

Spaces That Support Every Interaction

From privacy pods for focused virtual calls to relaxed lounge areas and fully equipped boardrooms, meeting spaces should accommodate a range of needs and working styles. Employees increasingly seek a variety of settings that offer different postures, sizes, and levels of technology integration ensuring that collaboration feels effortless, wherever it happens.

Flex & Flow

Active Spaces For Evolving Work

Versatile, mobile furniture solutions enable spaces to adapt effortlessly throughout the day. These flexible environments support a range of activities from learning and training to mentoring and hands-on collaboration encouraging creativity and engagement across teams.

Furniture That Transforms With Purpose

Adaptable furniture allows workspaces to seamlessly shift between functions, accommodating everything from large group sessions to smaller focus discussions or individual work. This flexibility ensures every square metre of the workplace is purposeful and responsive to changing needs.

Designed For Mobility & Ease

Equipped with mobile tables, writable surfaces, integrated technology, ergonomic seating, and accessible personal storage, these areas empower employees to reconfigure their surroundings with ease. With mobility front of mind, teams can create spaces that serve multiple purposes and inspire collaboration, comfort, and productivity.

Mindful Zone

Foster Employee Wellbeing And Safety

Create thoughtfully designed spaces and programmes that support overall health and wellbeing. These can range from yoga and meditation areas to private facilities catering to more personal needs.

Prioritising Wellbeing, Inspiring Performance

Height adjustable workstations and active seating empower employees to tailor their workspace to suit their individual preferences. Encouraging movement throughout the day, switching between sitting and standing adds variety and helps sustain focus and energy.

Sanctuary For Reflection

Dedicated respite rooms with comfortable lounge seating offer quiet retreats where employees can pause, decompress, and reset. As mental health awareness continues to grow, providing spaces for private reflection has become a vital element of the modern workplace.

Sustainability At The Core

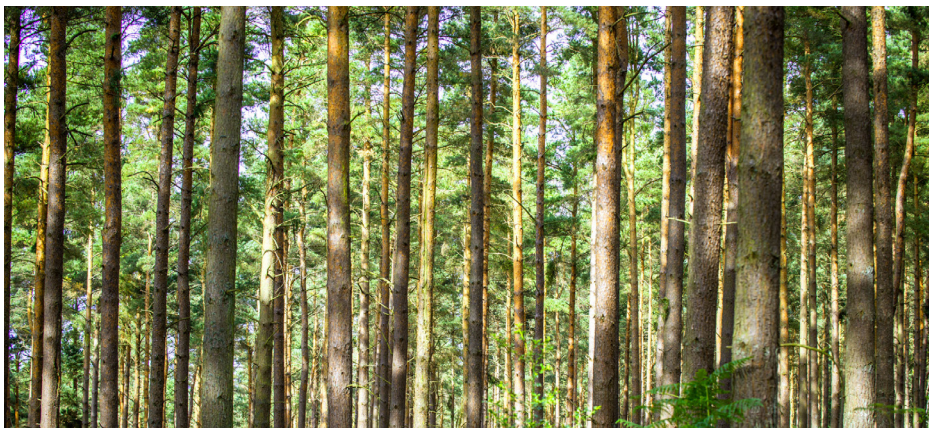
Sustainability is more than just a buzzword – it's a vital aspect of any business. These days, consumers and businesses alike seek out companies that are conscious of their carbon footprint.

From innovation in design and manufacturing, to circular design, to meeting goals for accreditation, sustainability is at the core of everything we do, as a crucial aspect of our corporate and social responsibility.

In striving for a circular economy and a lower carbon footprint, we promote sustainable consumption and production practices by designing our products according to sustainable design principles, conducting life cycle assessments, and offering end-of-life solutions. To support this we offer a complete recycling service, re.think, for all our customers, to compliment your sustainability goals.

Supplying Responsibly

Responsibility doesn't start with us – it starts with our supply chain. We monitor our suppliers and ensure their conduct and initiatives are ethical and sustainable, promoting human rights, fair labour conditions, and sustainability.



Socially Responsible

Community is crucial for any organisation, not just in its employees, but in the wider society, too. Good business practice pays back to the community by promoting employee wellbeing, charity, and ethical business practices, to contribute to a more equal and just society.

re.think
sustainable solutions

Like many, we are hot on sustainability. Unlike many, we provide a complete, sustainable waste management service on top of everything else. Through re.think, we recycle or reuse both waste packaging and old office furniture, regardless if it belonged to us originally - because we don't want to just reduce our own carbon footprint, but yours too.

Re.think provides our customers with an easy-to-access, hassle-free, way to dispose of waste; we handle collection, processing, and sustainable disposal with zero going to landfill.

Recycle Old Furniture

According to Waste & Resource Action Programme (WRAP) it is estimated that 1.2 million office desks and 1.8 million office chairs end up in landfill every year, making it the most common way to dispose of old or unwanted furniture.

The re.think programme, provides access to a nationwide collection and recycling service disposing of old or unwanted furniture. Through this scheme, any furniture collected is returned to the re.think depot and is stripped down, segregated, and fully recycled – avoiding landfill.

Re-Manufacture

In the ongoing fight against climate change, innovative new solutions for sustainability are needed to reduce waste. Remanufacturing is another solution, by utilise our state-of-the-art manufacturing facilities to breathe new life into old or unwanted office furniture, giving a second chance to products at end-of-life and saving them from landfill.

Through modern manufacturing processes that combine the efficiency of automation desks can be resized, pedestals convert into lockers, and re-upholster task chairs, sofas, and booths, all cleaned and quality checked.

Create a healthier work environment

Many employers are now providing workers with height adjustable desks, allowing workers to alternate between sitting and standing throughout the day. Sit-stand desks have a height adjustable feature so that you can stand or sit comfortably and work proficiently. They come in all shapes and sizes, just like people, and are suitable for any employee and work environment – in the office or at home – with a design based on exhaustive ergonomic research to provide an optimal workstation.

Why opt for a sit-stand solution?

Studies also show that Elev8 sit-stand desks promote creativity, team interaction, collaboration, and the willingness to share ideas. So, when it comes to the Elev8 range, a desk is much more than a place to work - it's a working culture that benefits both the employee and the company.

Wood finishes

Beech (B) · Black (BK) · Grey Oak (GO) · Kendal Oak (KO) · Oak (O) · Storm Grey (OG) · Walnut (W) · White (WH) · White / Black (WK) · White/Oak (WO)

Start simple then Adapt easily!

Step 1

Select a starter unit which can be single desk or back-to-back desks. Choose your add-on unit in the same width, depth and finish as the starter unit

Please note:
Don't mix 600mm deep desks with 800mm deep desks, and don't mix 1200mm deep with 1600mm deep back-to-back desk clusters.
You can't mix fixed tops and sliding top desks.

Step 2

Remove one set of legs from the starter unit and add to the end of the add-on unit

Step 3

Connect the add-on unit to the starter unit. Simply repeat the process and connect more add-on units to create runs of desks

Beam

Steel legs and framework for enhanced strength and stability

Manages all the cables from the desk to the floor, with a front panel that can be removed quickly and easily to gain access to wires

Mass cable riser

CODE	W	D	H	RRP
EDCR	390	65	500	£179

Black (K) Silver (S) White (WH)

Please add metal finish when ordering eg. EDCR in White = EDCR-WH

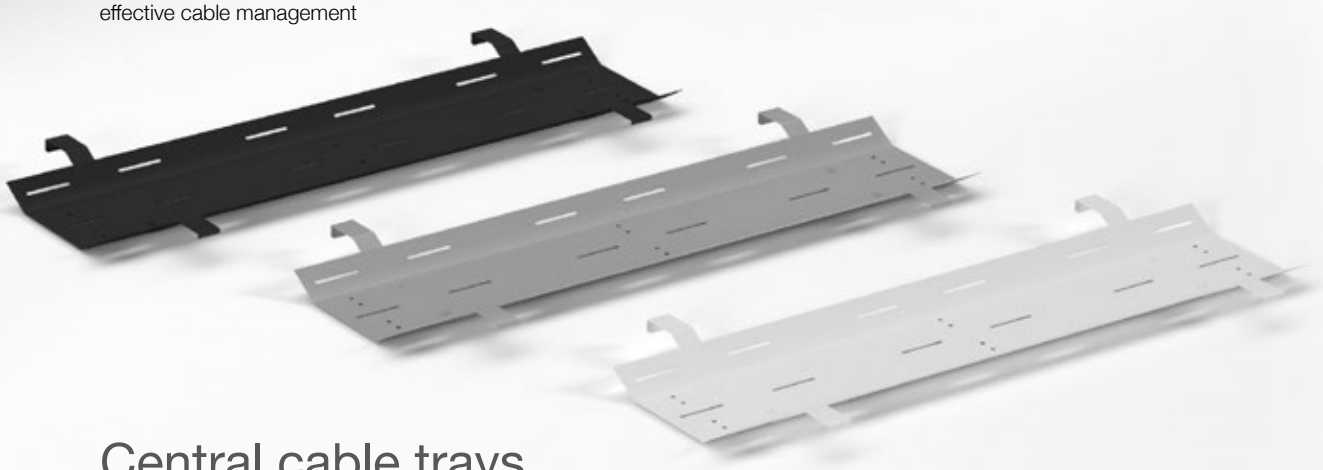
Offering choice is essential when creating a space for an agile workforce, and Adapt's thoughtful design and versatile components help you to do more with less.

The flexibility of bench desking allows for easy reconfiguration and expansion of the work area as one project is completed and a new team moves into the space.

Inset legs

Provides improved leg room as the recessed leg is positioned in the centre of the desks

Central drop down cable trays where cables can run between two trays for effective cable management



Central cable trays

CODE	USAGE	W	D	H	RRP
ED12DCT	Fits 1200 wide desk	1000	320	60	£159

Fabrics specified for their acoustic properties are ideal for wall coverings, suspended ceiling panels, desk mounted or free standing screens. The job of the fabric is to allow sound to pass through cleanly, or provide a degree of absorbency, which allows the specialist acoustic system behind to do what it needs to do.

SHUSH

CEILING & WALL TILES

Offered in classic plain or five imaginative patterns and a spectrum of 14 colours, these tiles can be arranged in countless orientations, letting you craft striking, design statements.

Choose from both precision-cut patterns and geometric grid designs; each collection is crafted to maintain visual flow when installed continuously across walls or ceilings.

Are you sitting comfortably?

Selecting the right office chair does not have to be complicated. The key points to remember when choosing office chairs are, how long are the chairs are being used for and what activity will the user be doing while using the chair.

Head rest

Comfort and support option for performance chairs

Back rest

Allow the spinal column to follow the natural 'S' shape

Lumbar support

Adjusts to support the lower back and spine

Arm rests

Provide support for the upper body and therefore reduce the stress on the users shoulders and back

Seat height

Allow for your feet to be firmly on the floor when seated. The seat height should be just below the knee cap when standing

Castors

To allow the chair to move freely on all surfaces

Chair base

5 star base to support the chair with weight loaded castors

Setting up your workstation

The first step in setting up an office chair is to establish the desired height of the individual's desk or workstation. This decision is determined primarily by the type of work to be done and by the height of the person using the

Correct Posture

1. Head

Keep your head upright and over your shoulder

2. Eyes

Look slightly downward (30° range from horizontal line of sight) without bending from the neck

3. Back

Your back should be supported by the backrest of the chair that promotes the natural curve of the spine

4. Arms

Elbows should be bent at 90°, forearms horizontal. Shoulders should be relaxed but not depressed

5. Legs

Thighs horizontal with a 90° -110° angle at the hip

6. Feet

Keep your feet fully supported on the floor. If this isn't possible, then the feet should be fully supported by a footrest

Incorrect Posture

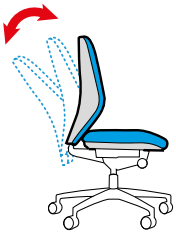
Chair Features & Benefits

The application of ergonomics in your workplace will make the environment more comfortable for all employees, boosting productivity and reducing stress – something that serves both the employer and employees alike.

Tilting

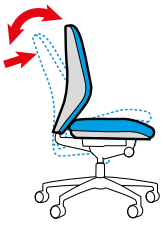
Knee tilt adjustment

Seat and back move backwards in tandem, lockable in various positions.



Standard tilt lock

Seat and back move backwards in tandem, lockable in upright position only.



Locking tilt lock

Seat and back move backwards in tandem, lockable in any position.

Independent seat tilt

Allows the seat to be independently tilted forwards and backwards.

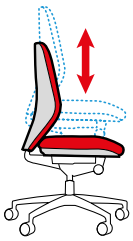
Tilt rocker

Allows the back to be independently tilted forwards and backwards.

Synchro seat & back tilt

Seat and back move in a synchronised motion. Lockable in multiple positions.

Mechanisms



Gas lift adjustment

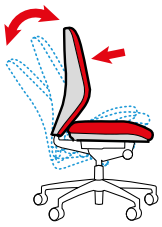
Raises and lowers the height of the seat to fit the user.

Back height adjustment

Allows the seat back to be highered and lowered to suit.

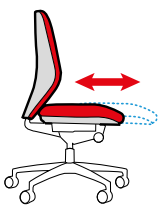
Back rake adjustment

Independent back tilt control. Lockable in multiple positions.



Weight tension control

Adjustable to the users weight for controlled smooth reclining action.



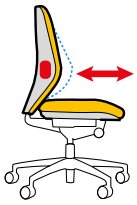
Seat depth adjustment

Seat slides forwards and backwards to match the users size.

Self weight active

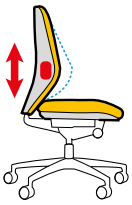
Adjusts to the users weight for smooth reclining action.

Back Support



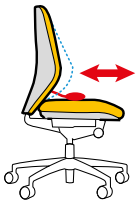
Lumbar support

Offers additional support to the lower back.



Adjustable lumbar support

Manual lumbar adjustment to support the back where needed.



Adjustable Lumbar pump

Adjust the back position easily with pump action to support the back.

Leg Support

Footrest

Adjustable position

Arms

Fixed loop

Loop arms fixed in position to provide support for the body.

Height adjustable

Arms adjust in height. Lockable in multiple positions.

Pivot

Arms can be pivoted back and forth for clear access.

Adjustable folding

Arms adjust in height and can be folded back when not required.

Adjustable 3D

Arms adjust in height, front & back, and left & right positions.

Adjustable 4D

Arms adjust in height, front & back, and left & right positions in addition to moving in and out to suit.

Adjustable 6D

Arm pad with forward and back, 360 degree rotation, width adjustable, pad tilt, further wrist tilt

Writing tablet

Arm comes complete with a writing tablet which can be adjusted for writing or reading or put down.

MFC

MFC or Melamine Faced Chipboard is melamine resin impregnated paper bonded both sides on to a chipboard core. MFC can be used to create very modern looking furniture for the home or the office with its printed wood grain on a melamine film that forms the face of the board, with environmentally friendly ABS edging to match the decorative paper top making it very resilient and hardwearing.

We have committed to stocking a range of best-selling fabrics and 2 vinyls, which will allow us to offer customers an even faster turnaround across the seating range and tailor seating choices to customers' individual specifications.

This colourful selection of fabric colours in the Camira Xtreme, Inloom Bondai and Fresh Vinyl ranges can bring the corporate palette into the office interior, creating a cohesive look or even zone different areas.

Sustainable fabrics

Sustainability is a key priority for us and we are committed to working closely with suppliers who share the same commitment, offering fabric ranges which allow for sustainable choices to be made and can be recycled at the end of life. Our selection processes factor in environmental concerns, quality standards and social responsibility.

Our fabric offering includes ranges made with recycled PET bottles, including bottles from sea waste. The bottles are sent to a recycling factory, where they are shredded into flakes, processed into chips and then extruded into filaments. This is then turned into yarn ready for weaving.

• Oceanic from Camira is part of the SEAQUAL Initiative, designed to combat marine plastic pollution and achieve a waste free environment. Oceanic is woven from yarn containing sea waste and each metre contains the equivalent of 26 plastic bottles, playing an important part in reducing the waste that reaches both our landfills and our oceans.

• Sealife from Inloom is a cross-functional yarn created entirely from post-consumer recycled plastics, woven from a blend of 50% SEQUAL yarn created from plastics collected from the oceans and beaches, and 50% recycled polyester yarn created from recycled PET bottles from land waste. For every 50M roll of Sealife produced, 12kg of marine litter is removed from our oceans.

• Earthly from Chieftain - is a luxurious fabric is made from 100% recycled fibres and is cradle to cradle certified. It is manufactured entirely from waste textiles. Textiles which may otherwise have gone to landfill. All the recycled yarns (100% recycled cotton and polyester) used in its creation are certified to the Global Recycled Standard. The GRS is internationally recognised, widely understood, trusted, and respected by consumers. It verifies the recycled content of products in every step of the value chain through third-party certification.

• VerdEco from Agua – is their first sustainable fabric. It's crafted entirely from preconsumer textile waste otherwise destined for landfill, which is then recycled into granules, spun into yarn, and finally re-woven; this is all done using zero water (in fact, upholstering a three-seat sofa in VerdEco saves on average 250 litres of the stuff).

• Renewed loop from Gabriel – is designed to eliminate waste. The waste age calls for pioneering solutions and innovative design that address the challenges of textile waste. As we all enter a new era of recycling, it is time to leave the throwaway culture behind, embrace waste as a valuable resource, and develop new ways to recycle materials again and again.

The quest to reduce textile waste and save resources, Gabriel have found a way to close the loop and transform textile waste into new textile products. Loop is a revolutionary take-back system, and a new category of products based on recycled textile waste – also called textile-to-textile recycling.

By recycling waste into new textiles that can be recycled again and again, creating a circular system – a closed textile loop – that reduces waste generation, conserves natural resources, and contributes to lowering CO2 emissions.

Fabric care

There are a wide choice of fabrics available and it is important that you select the right fabric for the application as well as creating the perfect finish to the chairs.

We recommend the basic principles for fabric care and maintenance continue to apply:

- Vacuum upholstery regularly to remove dust, dirt and crumbs
- Attend to stains quickly with a damp cloth
- Use branded upholstery shampoo for specific stains
- Periodically use specialist cleaning services eg dry cleaning

Most fabrics are bleach cleanable with a 10% bleach chlorine solution (which will kill Coronavirus germs). There are also an increasing number of fabrics that are anti-microbial to protect against a wide range of bacteria which cause infection - such as MRSA, Salmonella and E.coli - which can cause serious additional ill health that must be avoided by anyone already battling a potentially lethal virus infection.

These fabrics can provide hygiene benefits in wide ranging commercial end-use areas, including healthcare, hospitality, education and contract office.

For further details contact our sales team or refer to the fabric manufacturer websites.

Fabric restrictions

Certain soft seating fabrics listed in this guide may not suitable for use on all soft seating products. We reserve the right to reject orders to make products in selected fabrics if we believe that the fabric is inappropriate for use due to 'fit and form' unsuitability. In this instance we will always recommend a similar fabric that is more suitable for use on that particular product.

Fabric hazard ratings

Low - EN1021 Parts 1 & 2 cigarette and match
Medium - BS5852 Ignition source 5 / Crib 5

Fabric bands

Please contact our sales team for a price if your preferred fabric choice is not listed. Please make sure you check the suitability of a fabric before recommending a product. If two fabrics are used on one item e.g. two-tone, the cost is calculated on higher of the two fabric bands. All orders for leather are priced on application.

Fabric colour variations

Whilst every effort is made, no guarantees are made against the minor variations in the colour of commercial fabrics. All striped fabric will be upholstered vertically unless advised.

Photographed upholstery

While every effort is made to represent colours accurately, we cannot guarantee the colours you see exactly match the colours of the actual fabric due to printing processes.

Measurements

All measurements are in millimeters and can have a tolerance of ±12mm on all soft seating. Measurements may vary depending on components used and we reserve the right to change them from time to time.

Customers own fabrics

Fabrics not listed or customer supplied fabrics need to be approved before acceptance of orders. A pattern charge may apply to some fabrics. We reserve the right to reject fabric that we believe to be unsuitable for the product. We are unable to guarantee any product or fabric supplied by a customer meets fire regulations or standards.

Please contact our sales team if you would like any fabric samples sent out to you.

Ordering

For all made-to-order products, it is our policy that once these products have been ordered they cannot be canceled or amended.

Pricing

All prices shown are in sterling (£) and are subject to current rate of VAT.

Warranty

All products are guaranteed against manufacturing defects, except for upholstery, castors and mechanisms which are subject to usage related wear and tear. The warranty is effective from the day the product leaves the factory and the supplier reserves the right not to apply the warranty in cases of inappropriate use or when a product has been tampered with by a third party or interventions by non-authorised personnel. All complaints concerning the goods must be made in writing and the company shall undertake to repair any product or part of a product that proves to be faulty.
