Why Altro safety flooring?

Altro slip-resistant safety flooring is a modern solution, meeting the highest standards of safety and hygiene.

- Slip-resistant, even when wet, throughout lifetime of floor
- Impervious surface, grout-free
- Coves to wall joints for rounded corners
- Contains Altrosan integral bacteriostat to combat bacterial growth
- Incorporates Altro Easyclean Technology for improved cleanability
- Resilient surface, comfortable underfoot, contributes to reduced ambient noise levels
- Homogeneous and heterogeneous options available in high quality PVC, which have aggregates throughout the wear layer of the floor, to guarantee long-lasting performance
- Anti-static option available

How vinyl safety flooring works

Altro safety flooring appears smooth on the surface but the pressure created by walking over the safety flooring causes the aggregates in the flooring to stand proud and rub against the shoe, creating friction. Because of this, Altro safety flooring remains slip-resistant, even with spillages upon it.

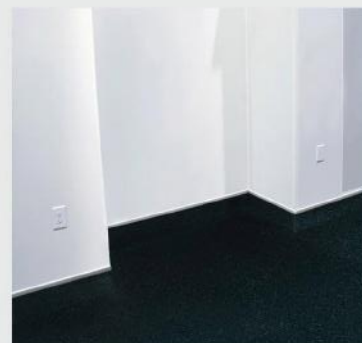

Altro Puraguard Hygienic Walling

Altro Puraguard wall panels are smooth, durable, cleanable, and easy to install. Altro Puraguard is impact resistant, making it a top choice for wall protection in commercial kitchens and food service areas.

Altro Puraguard is available in 4' x 9' and 4' x 10' panels sizes and includes a variety of connectors, reducers, and corner accessories. This makes Altro Puraguard extremely efficient and easy to install. This greatly minimizes downtime, a must for busy commercial kitchens! Create a complete floor and wall kitchen

solution by combining Altro Puraguard wall panels and accessories with Altro safety flooring. The easy to maintain, hygienic PVC surface will help assure that your kitchen is clean and that food is safe for consumption.

Flooring and Walling solutions that make a difference

Tarkett offers a range of products, ideal for the following environments:

- Healthcare
- Education
- Offices
- Indoor Sporting
- Retail/Hotel
- Housing

Founded in 1886, Tarkett is a world leader in the vinyl flooring industry. With a diversified and professional team, Tarkett invests in innovation, materials and technologies to make people's lives safer, more productive and comfortable in workplaces, living spaces or while having fun. Throughout the world, the Tarkett group is recognized as a provider of creative and high-performance flooring & walling solutions that cater to the most varied projects.

- *More than 130 years of experience in the manufacture of floors*
- *Products that adapt to diverse specifications and needs of the market*

Tarkett offers Floorcoverings for every need from vinyl & linoleum sheeting which is ideal for healthcare, education and commercial environments to the stylish and increasingly popular Luxury Vinyl Tiles (LVT).

Tarkett's popular resilient homogeneous vinyl flooring includes:

- **Plus Range**
- **Premium Range**
- **iQ Range**

BEI has installed Tarkett vinyl floor coverings throughout Trinidad & Tobago and the Caribbean at several health facilities & hospitals, libraries, schools, offices and supermarkets. Tarkett's Premium range of homogeneous vinyl flooring continues to be the floor of choice for economical reasons. It is low maintenance, needing no additional surface treatment such as polish or wax when exposed to normal wear and tear thereby greatly reducing life cycle costs.

The Tarkett range also includes Walling products as follows:

ProtectWALL 1.5 & 2: a unique 1.5mm & 2mm high-performance wall covering solution, ideal for areas that require a high level of impact resistance, such as corridors in healthcare & education environments. ProtectWall is easy to clean and maintain and is also available in a Clean Room option.

Wallguard: with its 1.3mm thickness this is the perfect solution for areas that need special protection, e.g. healthcare, laboratories and light industry.

Aquarelle Wall/HFS: at just under 1mm thick, it provides a waterproof walling installation ideal for wet room & shower applications, with fresh colours, modern designs and borders. It is hygienic and easy to maintain.

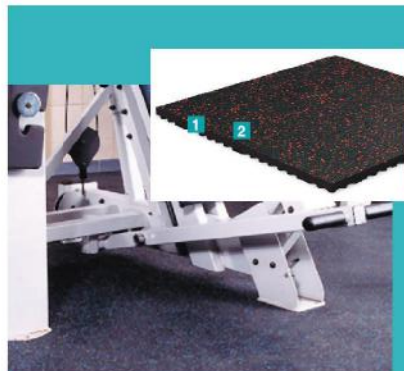

THE ULTIMATE FLOORING EXPERIENCE

We can customize to suit your office decor!

DROPTILE

Droptile is a one inch thick tile that provides supreme durability and maximum vibration absorption. It provides the perfect level of support for weights and equipment without showing signs of wear. The elevated profile of Droptile's subsurface allows wires and cables to be fully integrated beneath the surface, preventing cable clutter. These 24" x 24" x 1" rubber floor tiles can easily be installed over any surface with or without the use of adhesive

1 Hidden Dowel Locking System: With Droptile, rubber floor tiles are connected with hidden dowels, locking them together securely without being visible.

2 Standard 1" Thickness: Droptile consists of 1 inch thick rubber that protects the subfloor, provides comfort for the user, reduces vibration, and increases durability. It also has an elevated subsurface allowing space for wires and cables to be integrated beneath the floor.

DROPZONE/DROPZONE SPECKLE

Dropzone is a weight room flooring in its most fundamental form. This single-ply, high density floor is manufactured with nearly 100% recycled rubber, giving it the most recycled content in the "Drop" line of flooring by percentage. It provides optimal traction, comfort, sound insulation, and above all durability. Dropzone is available in 23" x 23" interlocking rubber floor tiles, 36" x 36" straight edge tiles, or 48" wide rolls.

Dropzone Speckle blends recycled rubber with coloured EPDM rubber chips offering a wide variety of colour options while offering the same weight room flooring protection as Tarkett Sports' Dropzone. It is available in the same sizes as Dropzone with the surface appearance of Dropzone Speckle hiding seams and creating the look of continuous rubber flooring.

1 Interlocking Tiles, Straight Edge Tiles, or Rolls: Dropzone or Dropzone Speckle offers a variety of format options for installation, making it adaptable to any facility or preference.

2 Standard Thickness of 8mm: Dropzone and Dropzone Speckle's 8mm of recycled rubber flooring provides protection, comfort, sound insulation, and above all durability for your gym.

OMNISPORTS

Omnisports is becoming one of the most popular types of sports gym flooring where its characteristics make it ideal for basketball, volleyball, martial arts, yoga and many other applications. The versatility of Omnisports extends beyond just sport; it can accommodate tables, chairs, or desks for conferences and assemblies. This makes Omnisports the perfect sports gym floor for schools, universities, and community centers, where sports or other events might occur on any given day.

CLUTCH COURT PERFORMANCE

The ClutchCourt Performance system is Tarkett Sports' most popular wood floor. It incorporates two plywood layers for stability and ¾" CoreCushion shock pads for a high-level of shock absorption. This system is well suited for basketball and is constructed with competitive sports in mind. It is also a popular wood floor for dance studios and aerobic exercise areas.

Luxury Vinyl Tile and Plank

With a vast range of designs drawn from the natural world and major design trends, Tarkett Luxury Vinyl Tiles and Planks provide excellent performance and flexibility with high-design appearance.

LVTs for your Home

Explore our wide range of colours, surface aspects and formats to find the style you want with iD Essential 30 or Essence line. Available in several colours where the surface is carved to match the natural essence of wood design, but unlike real wood the surface interior does not absorb water and dirt and can be easily cleaned.

LVTs for Semi-Commercial use

iD Selection 40 offers a high quality and comfortable flooring for everyone's daily experience. Its design flexibility and durability make it a great choice for commercial interiors with light traffic from hotels, offices, stores and shops. Available in 30 designs inspired by authentic materials – light to darker woods & stone to metallic decors.

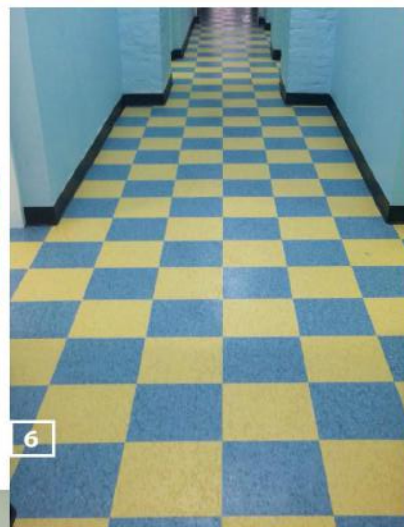

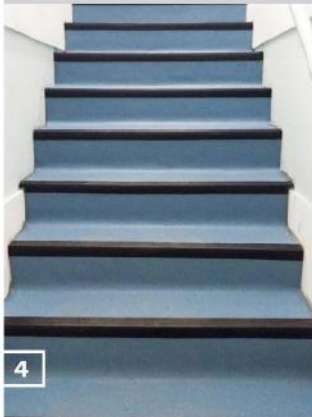

LVTs for Commercial use

Explore limitless design possibilities in a truly modular range to create spaces that build brand image, evoke emotion and positively shape the customer's experience. Customise every aspect from design to surface structure to create unique decors with iD Inspiration 55-70 or Ambianta line of LVTs. Available in over 75,000 potential combinations through your choice of format, design, surface structure and beveling.

A Tarkett Company

Carpet Tiles and Broadloom

DESSO supplies almost 80 years of quality and has built a reputation as a manufacturer of high quality carpet tiles and broadloom specifically designed for both commercial and domestic use.

COMMERCIAL

DESSO focuses primarily in superior floor design, providing high quality commercial carpet tiles and broadloom. Its commercial products can be found in offices, banks, shops, public buildings, schools, universities and hospitals.

RESIDENTIAL

DESSO has a rich history in designing and manufacturing high-end consumer carpets. The DESSO collection is inspired by the latest trends in structures, materials and colours seen in interior design.

HOSPITALITY

DESSO is a leading supplier of high quality wool and nylon carpets offering custom made design carpets and carpet tiles, providing a complete package for hospitality floor covering in all areas.

MARINE

DESSO is a leading supplier of high quality wool and nylon marine carpets offering custom made design carpets and carpet tiles focusing primarily on superior floor design and adding functional benefits to our products for marine environments.

AVIATION

DESSO is a leading supplier of high quality aircraft carpets and with a thorough knowledge of the market, we translate your values and inspiration into commercial and practical solutions with truly innovative carpet designs.

Tandus | Centiva

A Tarkett Company

Available in modular (tiles) and rolls, Tandus has more than 50 years of experience manufacturing carpet products proven to perform.

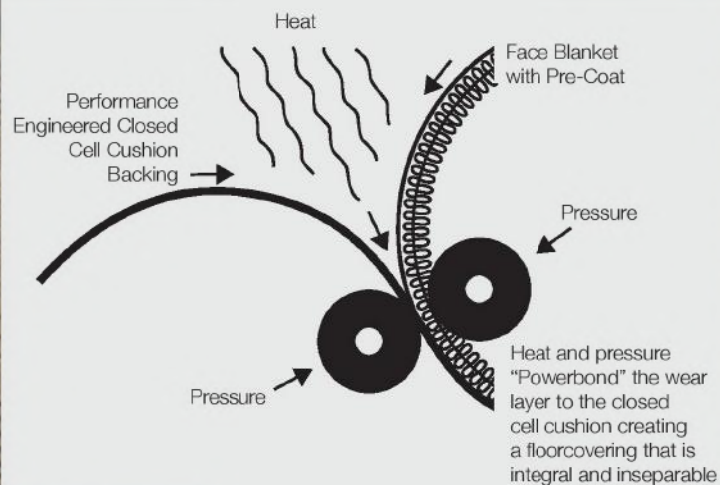

Modular

In 1969 Tandus Flooring introduced the first carpet tile. Modular carpet from Tandus Flooring is available with nylon fibre and a range of backing options such as Conserv™, ER3®, Ethos™ and Flex-Aire™ which boast compliance with some of the following standards; NSF-140, ASTM D-3574, ASTM D-3976.

Powerbond® was introduced in 1967 and is the industry's first hybrid resilient sheet flooring, with a heterogeneous construction of closed-cell cushion and nylon wear layer. It provides an impermeable barrier to moisture and helps reduce mold and mildew growth between the subfloor and floorcovering. Powerbond is also easier and less expensive to maintain than traditional broadloom carpet and is supplied with a non pro-rated 25 year warranty against zippering, edge ravel and delamination.

Broadloom & Woven carpet provides our clients with rigorous performance to meet the critical demands of floorcoverings in a commercial application. The Tandus broadloom construction options include SuperLok®, LifeLong™ and ErgoStep™, while the woven includes Crossweave® and CrossCushion™.

GRADUS

contract interior solutions

Accessories

Barrier Matting Systems

An effective barrier matting system helps to minimise the risk of slip accidents caused by wet flooring, reduce maintenance costs and improve the appearance of internal floorcoverings by significantly reducing the amount of dirt and moisture tracked into a building.

Skirting & Cappings

Skirtings, cove formers and capping strips are used to provide a clean, neat solution for junctions where the floor meets the wall.

Floor Trims / Transition Strips

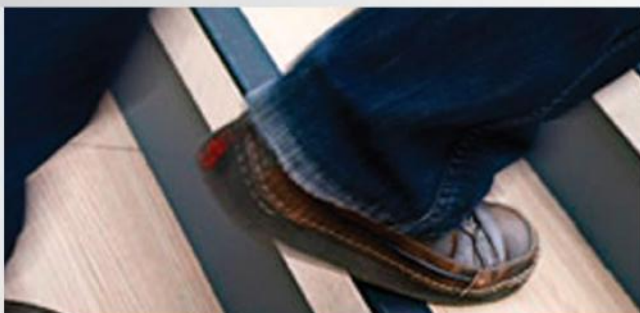

In addition to providing an aesthetic finish, transition strips reduce the risk of accidents for pedestrian traffic by providing a safe link between floorcoverings. A transition strip can also provide a safe joint where wheeled traffic is expected and ensures that trolleys can move freely between different types and heights of floorcovering, reducing the risk of trolleys tipping over. Gradus offers a comprehensive range of transition strips.

Stair Edgings & Trims

Gradus Stair edgings are used to define the edges of steps and provide slip resistance thereby minimising trip hazards. The stair edging can also be used to protect the edges of floorcoverings from becoming worn or damaged. Safety Stair Edgings are available for applications from light to heavy duty or industrial use.

Stairtile Slip-Resistant Flooring

Stairtile is a rubber composite material designed to provide a hard-wearing, slip-resistant finish for stairs and floors.

F. Ball and Co. Ltd.

Adhesives and Underlayments

F. Ball's total commitment to the flooring industry has resulted in the development of a range of products carefully matched to the requirements of flooring professionals throughout the world.

The high performance range comprises:

Resilient Flooring & Walling Adhesives

A comprehensive range of adhesives for resilient floorcoverings, many of which offer specialist characteristics such as plasticiser resistance, pressure sensitive characteristics or anti-static properties.

Textile Flooring Adhesives

A comprehensive range of adhesives for installation of carpet, carpet tiles and underlay.

Wood Flooring Adhesives

Covering the needs of day-to-day wood floor installation, the range offers a choice of adhesives to meet application, site and performance requirements.

Floor Smoothing Underlayments

F. Ball offers a range of fast drying, self-levelling, smoothing underlayments suitable for use in light to heavy-duty areas for preparing sound absorbent and non-absorbent subfloors prior to the installation of new floorcoverings.

Waterproof Surface Membranes

F. Ball offers a complete system for the control of subfloor residual construction moisture. Remedial treatment for damp floors can be quickly and easily achieved with the range of Stopgap waterproof surface membranes.

Marine Flooring Systems

A range of MED-certified flooring adhesives and underlayments approved for marine and offshore use including offshore platforms, RO-RO ferries, super yachts, barges and many other types of sea-going vessels.

Rubber Flooring Solutions

Rubber, as a raw material, has unique stress-resistance and elasticity characteristics, making it ideally suited to producing a wide range of high-performance flooring products.

Artigo has worked closely with its clients to develop unique and aesthetically innovative rubber flooring solutions that take into account all the functional aspects of high traffic environments: from the ease of installation to the reliability over time, through to sound reduction and lower maintenance costs.

"High performance rubber surfaces, ideal for flooring of schools, offices, hospitals, museums, and indoor public spaces."
