

# Card Authentication

Use existing employee identification cards to unlock MFP.

## **ONE SWIPE DOES IT ALL: AUTHORIZE, RESTRICT, LIMIT**

Information security is essential to protect your business. KYOCERA Card Authentication Solution is a quick and convenient security option for your multifunctional devices by utilizing employee ID badges. With a simple swipe of a badge, users gain immediate access to their KYOCERA MFPs, authorizing them to use features specific to their job functions. With the Card Authentication Solution installed, corporate network resources and information can be secured to prevent unauthorized access.

It also enables administrators to track usage for reporting or accounting purposes, therefore saving your organization unnecessary waste. By leveraging KYOCERA MFPs with Card Authentication Solution, your vital business information can be protected without the need to invest in additional security cards and high-priced hardware. It is a cost effective solution for any enterprise.

## **BENEFITS**

- Improved device-level security by integrating with KYOCERA MFPs
- Seamless integration with your business infrastructure using most common company ID badges
- Restrict, limit and authorize device access by users or departments (when combined with KYOCERA's Cost Control & Security Solutions)
- Track usage for reporting and accounting purposes (when combined with KYOCERA Net Viewer or PaperCut)

## **HIGHLIGHT**

**The plug-n-play reader design is truly easy to integrate into designated KYOCERA MFPs. The Card Reader connects directly to the USB port for advanced security.**

- Choose the level of authentication and authorization that fits your organization's infrastructure
- Eliminate errors associated with manual entry of user credentials at the device

## **COMPATIBLE CARD TYPE**

- HID Prox
- Multi125
- Inditag
- Mifare
- Multi ISO
- HID
- iCLASSLegic
