KYOCERA Mobile Print

An application that lets you use your mobile device (iOS or Android) to connect wirelessly to compatible KYOCERA printing devices on your local area network. When connected, you can do the following:

- Print photos and documents stored on your mobile device or a supported external service

- Scan documents on a compatible printing device and save them to your mobile device or a supported external service:
    - Dropbox
    - Evernote
    - OneDrive
    - Google Drive
    - SMB (Shared Folder)

- Send documents by email

- Print webpages accessed through the app's built-in web browser
